- Quality-Assured HDPE Construction
- Competitive Pricing
- Custom Printing & Graphic Design

Practical Solutions  
For Your  
Container Needs.

Since 1977, Century Container has become one of the Midwest's leading suppliers of injection-molded high density polyethylene (HDPE) pails and lids. We manufacture our pails in our own facilities in northeast Ohio, print them in our own state-of-the-art graphics and print departments, and ship them on our own trucks.

This "one stop shop" approach gives Century the advantage of controlling all aspects of production and delivery, so we can respond more quickly and efficiently to our customers' needs.

## Product Quality.

- **We use only quality-tested resin.**

Superior products require superior raw materials. We verify the melt flow and density specifications of every shipment of resin we receive while it is still on the rail car outside our facility. If it doesn't meet our quality standards, it literally won't make it through our door.

- **We routinely test our pails and lids for structural integrity and impact resistance.**

In addition to meeting ASTM test standards for open-head plastic pails, Century products must also pass our own proprietary tests to ensure they'll perform with the strength and durability our customers expect.

- **We offer U.N. rated and FDA certified options.**

Our Standard 5 Gallon and 20 Liter pails are available as U.N. rated packages, and any of our pails and lids can be made with certified FDA Grade resin for use as food safe containers.

## Personalized Service.

With nearly four decades' experience in container manufacturing, we've learned that the key to our success is the long-term, loyal relationships that we build with our customers. Our dedication to exceptional customer service is the foundation of these relationships.

- **Flexibility means faster, more personal service.**

Because we maintain control over all aspects of production and delivery, we can be flexible in ways that other vendors can't.

- **We offer the product expertise and delivery logistics of a large national manufacturer, while still dealing personally with our customers like a small business.**

- **We're always willing to work with you to provide what you need, at the best possible value.**

At Century, customer service is our first commitment. We look forward to demonstrating that commitment on behalf of your company very soon.

Our own fleet of Century trucks allows us to offer more cost-effective and flexible shipping options to our customers.

# Pails that perform.

## Custom printing & color matching in one easy step.

For private label printing, there's no need to look for a separate (and more costly) printing vendor.

- **We have an in-house, full-service print department.** We use offset lithography to reproduce the artwork of your choice on any of our containers.
- **We can custom tint any of our containers to the Pantone value of your choice.** Print and pail colors are calibrated in the same facility for consistent results.
- **We have full creative design capabilities.** From logos to complete layouts, our design staff will work with you to create original digital graphics to serve all aspects of your private labeling needs.

## Above-Beam Printing.

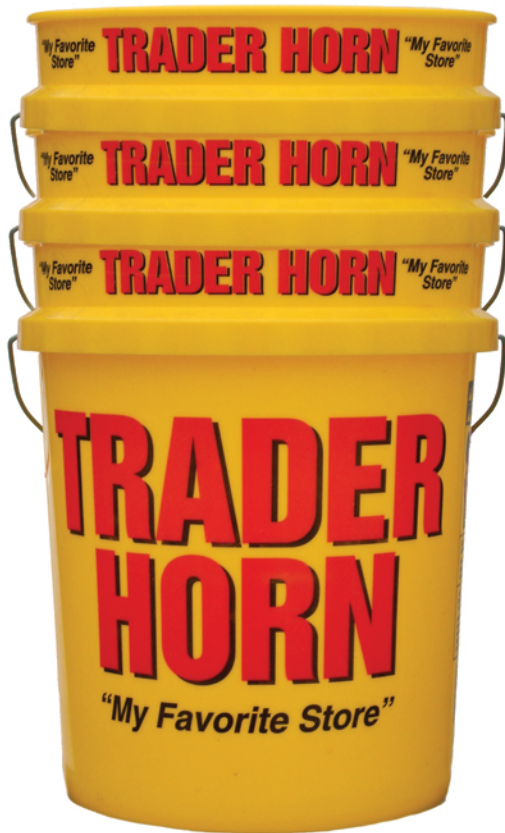

And here.

Your message here.

Always an innovator, Century Container is the only company that can print above the pail's "beam," or handle ledge. Instead of being empty space, the area above the handles now becomes a banner that significantly expands the printable surface of the pail.

This exclusive printing process gives you a perfect place to display a company name, logo, tagline, web address or promotional message. And the space above the beam is the only area still visible when empty pails are stacked.

This printing option is available on our 3.5 Gallon, 5 Gallon and 6 Gallon pails. Please contact our Customer Service staff to learn how above-beam printing can add value to your next print order!

# Unique Snap-On Lids

Only Available from Century Container!  
Our own patented design, the Seat-Tray® snap-on lid is the only printable lid in the industry!

- Snaps on to any standard utility pail and turns it into a handy seat.
- Flip the lid over, and it nests in the top of the pail to serve as an elevated dish or tray table.
- Great for camping, picnics, tailgate parties and much more!

Choose from the original Seat-tray design (above center) or the taller Top Hat lid. Both are 12" in diameter and feature a circular 8" printable surface.

## 6 Gallon Insulated Cooler & Lid

Our 6 gallon pail doubles as a convenient insulated cooler when paired with the Top Hat lid. A 4-gallon covered styrofoam insert fits snugly inside to keep contents hot or cold for backyard parties, tailgaters, sporting events, camping and year-round outdoor activities. The lid keeps things covered easily when not in use, and like the pail can be custom tinted to the color of your choice and printed with your logo.

Lids fit a variety of pail sizes.

Great for outdoor activities.

Keeps sporting goods organized.

Perfect for pet foods, too!

# Competitive Pricing.

Our goal is to become a partner to our customers by offering the best possible value for the long term. That means we view competitive pricing as a commitment, not just an enticement.

We would greatly appreciate the opportunity to speak with you about how we might serve your business, and to offer a custom quotation. For more information or to speak with a customer service representative, please call us toll-free Monday through Friday, 8:00 a.m. to 6:00 p.m., at **1-800-955-8443**.

**Quality Products. Personalized Service. Competitive Pricing.**
